

AI INNOVATION HACKATHON 2026

OFFICIAL SUBMISSION FORMAT

Research • Innovation • Entrepreneurship

1. Stage 1 — Idea Submission & Screening

Date: 19 October 2026

Participants submit or pitch a proposed solution based on one published problem statement. The idea submission is not the final project submission.

Required Information

- Team name
- Team members
- Selected problem statement
- Problem understanding
- Proposed solution
- Innovation / novelty
- Proposed technology / AI approach
- Expected impact
- Brief implementation plan

2. Screening & Selection

Ideas may be evaluated on understanding of the problem, relevance, innovation, feasibility, appropriate use of AI/technology, potential impact and clarity of the proposed approach. Only selected teams proceed to the Main Hackathon / Final Development Round.

3. Stage 2 — Final Project Submission

Final-round teams must submit their completed project through the official submission process provided by the organizers.

Required Final Submission Information

- GitHub repository URL
- Team details
- Selected problem statement
- Project description
- Demo link / video, where applicable
- Required documentation
- Other information requested by the organizers

The GitHub repository and the official submission form together constitute the final submission.

4. GitHub Repository Requirements

Each final-round team must maintain its project in a GitHub repository. The repository must be accessible to the judges.

- Source code
- README.md

- Requirements / dependencies
- Installation instructions
- Usage instructions
- Documentation
- Dataset information
- Model information
- Screenshots
- Demo information
- Credits / attributions

5. README.md Requirements

- Team name
- Team members
- Selected problem statement
- Problem description
- Proposed solution
- Key features
- Technology stack
- Methodology
- Architecture / workflow
- Installation instructions
- Usage instructions
- Dataset information
- Models used
- Results
- Screenshots / demo
- Limitations
- Future scope
- External resources / attributions

6. Recommended Repository Structure

```

AI-Innovation-Hackathon-2026/
├── README.md
├── src/
├── models/
├── notebooks/
├── documentation/
├── demo/
├── requirements.txt
└── LICENSE (if applicable)

```

7. Final Submission Checklist

- Correct team details
- Correct selected problem statement
- Source code uploaded
- README completed

- Requirements / dependencies included
- Dataset and model information provided
- External resources acknowledged
- Demo prepared, where applicable
- GitHub repository accessible to judges
- No passwords, API keys, access tokens or sensitive credentials uploaded
- Official submission form completed
- Final submission completed before the announced deadline

8. Important Notes

- The final submission deadline will be announced as part of the official 20 October 2026 hackathon schedule.
- The version available at the submission deadline will be considered for evaluation, subject to the official rules.
- Teams remain responsible for ensuring their repository and submitted information are accurate and accessible.
- AI-assisted development tools are permitted as described in the official Rules & Regulations; significant use should be disclosed where requested.
- External resources, datasets, APIs, libraries and models must be used lawfully and appropriately acknowledged.
- Do not upload passwords, API keys, access tokens, private credentials, confidential documents or sensitive personal information to a public repository.
